

Academic Standing, Probation & Remedial Intervention Dossiers AY 2025-2026

School of Computing & Engineering | Office of Academic Advising & Registrar

STRICTLY CONFIDENTIAL — ACADEMIC STANDING INTERVENTION DOSSIER. This document contains formal diagnostic evaluations, cognitive remedial strategies, peer tutoring session logs, and Academic Standing Committee deliberation records for students subject to Academic Warning, Probation, or Suspension. Access is restricted to the assigned Faculty Advisor, Academic Standing Board, Registrar, and Dean of Academic Affairs.

1. Academic Standing Framework, Tier Definitions & Early Warning System

Northgate Institute's Academic Standing Framework reflects current best practices in university student success research, specifically drawing on the MDRC's CUNY ASAP model and AI-augmented early intervention systems adopted at forward-thinking institutions since 2024. The framework operates on a 4-tier classification updated at the end of each semester by the Registrar's office:

- **Tier 1 — Good Standing:** Cumulative CGPA $\geq 6.00/10.0$ with normal credit completion velocity (completing $\geq 75\%$ of registered credits each semester). No action required.
- **Tier 2 — Academic Warning:** Semester SGPA < 5.50 while cumulative CGPA remains ≥ 6.00 ; OR completion rate drops below 75% for the first time. Triggers: automated DCMP alert to student and advisor; mandatory advisor conference within 10 days of result publication; recommended (non-mandatory) load reduction; referral to Student Wellness Center for academic stress screening.
- **Tier 3 — Academic Probation:** Cumulative CGPA < 6.00 ; OR two consecutive semesters at Academic Warning. Requires: mandatory signed Academic Recovery Contract (ARC) within 10 working days of semester commencement; administrative registration cap of 14 credits; mandatory 3 hours/week Academic Support Center attendance with verified sign-in log; bi-weekly advisor conferences; disqualification from extracurricular leadership positions and external competition representation; Bursar Hold exemption review for financial aid recipients.
- **Tier 4 — Academic Suspension:** Cumulative CGPA < 5.00 for three consecutive semesters; OR accumulated uncompleted credits exceeding 24 (more than 1.5 semesters of normal load). Triggers: 1-year mandatory academic separation; hostel room must be vacated within 15 days; student may petition the Standing Committee for reinstatement during the January or August review windows.

2. AI-Augmented Early Warning System: Technical Architecture

The DCMP Early Alert system integrates data from 6 sources — LMS engagement logs, attendance biometric records, assignment submission timestamps, quiz performance trajectories, library access frequency, and counseling center self-referral — to compute a composite 'Academic Risk Score' (ARS) on a 0–100 scale. An ARS ≥ 65 in any rolling 3-week window triggers an automatic Level-1 alert to the faculty advisor. An ARS ≥ 80 triggers a Level-2 alert also escalated to the Head of Department. The system was trained on 8 years of anonymized historical data ($N = 42,000$ student-semester observations) and achieves a precision of 0.81 and recall of 0.78 for identifying students who ultimately require formal probation intervention. Advisors are required to act on all Level-1 and Level-2 alerts within 5 working days.

3. Diagnostic Case Study: Marcus D. Whitfield (Term 2 Probation)

CGPA Trajectory: Sem I: 7.12 → Sem II: 6.89 → Sem III: 6.41 → Sem IV: 5.42 (decline of 1.70 grade points over 4 semesters, constituting a 24% cumulative drop). **Root Cause Analysis:** Comprehensive diagnostic evaluation (standardized learning style inventory, mathematics anxiety scale — MAS-R, time-management self-efficacy questionnaire) confirmed: (1) Mathematical proof construction anxiety — scoring at the 78th percentile on MAS-R, indicating high mathematics anxiety specifically in formal-proof contexts; (2) Ineffective retrieval practice — student reports highlighting textbook notes rather than active recall; (3) Leadership role overcommitment — serving as Technical Secretary of IEEE-CS Chapter required an estimated 18 hours/week during Semester IV (confirmed by student self-report); (4) Part-time employment — 10 hours/week at a private tutoring center for supplemental income due to reported family financial pressure.

Remedial Prescription (Academic Recovery Contract Terms): (1) Term credit cap: 12 credits (CS301, CS340, PE-01 only). (2) Peer tutor assignment: TA Vikram Seth — 3 hours/week, Tuesday/Thursday 4-5:30 PM, focused on formal proofs, data structure analysis, and OS concurrency concepts. (3) Academic Support Center mandatory attendance: Monday 3-5 PM (Mathematical Reasoning Clinic), Wednesday 3-5 PM (Systems Programming Workshop). Attendance log must be submitted to advisor by Friday 5 PM each week. (4) Study strategy restructuring: Advisor prescribed the Leitner flashcard system for concept retention, Feynman technique for complex proofs, and the Pomodoro technique (25-min focused blocks) for time management. (5) Financial Aid Bridge Grant referral: student connected with the Emergency Student Welfare Relief Fund to reduce employment hours. (6) Progress review: bi-weekly advisor conferences (2nd and 4th Tuesday, 2 PM).

4. Diagnostic Case Study: Devon K. Ramirez (Term 1 Probation)

Root Cause Analysis: Adaptive diagnostic testing (administered via DCMP diagnostic module) revealed performance breakdowns in: (a) Multivariable calculus (surface integrals, vector fields) — score at 23rd percentile; (b) Complex number theory applications in signal processing — 19th percentile; (c) Basic circuit analysis (Thevenin's theorem, AC impedance) — 31st percentile. Student report revealed: attended competitive engineering coaching centre in Class XI-XII but received instruction focused on multiple-choice exam strategy rather than conceptual depth. The exam-pattern gap (MCQ coaching vs. proof-based university assessment) appears to be the primary structural cause.

Remedial Prescription: Mathematics Clinic enrollment (2 sessions/week, each 90 minutes); CBT-based test anxiety program (6 sessions, Student Wellness Center); credit load reduction to 14 credits; weekly verified homework submission; assigned peer mentor Meera Iyer (Data Science, CGPA 8.7) through the Peer Mentorship Programme; required to attend all tutorial sessions for MA102 and CS201.

5. Diagnostic Case Study: Naomi L. Chen (Term 3 Probation — Committee Review)

CGPA Trajectory: Sem I: 7.44 → Sem II: 7.01 → Sem III: 5.92 (major drop) → Sem IV: 5.68 → Sem V: 5.44. The Standing Committee reviewed Naomi's case on August 14. Medical documentation (certified by University Chief Medical Officer) confirmed a diagnosis of Major Depressive Disorder (MDD) treated with pharmacotherapy since October 2023, coinciding with the Semester III decline. The Committee's deliberation: voting 4 in favor (extension) vs 1 opposed (suspension). **Decision:** One final probationary extension term. Strict conditions: minimum SGPA of 6.50 in Monsoon 2025; mandatory bi-weekly psychiatric follow-up confirmed by medical progress notes; maximum 16 credit registration; personal faculty advisor Dr. Sarah Jenkins designated as primary contact for coordinated academic-health support. Failure to meet the SGPA threshold will result in immediate academic suspension effective January 2026.

6. Diagnostic Case Study: Tyler R. Scott (Suspension Warning — Final Term)

CGPA Trajectory: Sem I: 6.42 → Sem II: 6.01 → Sem III: 5.44 → Sem IV: 4.80. **Uncompleted credits:** 28 credits across 4 semesters (exceeds the 24-credit suspension trigger). **Committee Action:** Final warning issued — effective suspension trigger if CGPA falls below 5.00 or SGPA in Monsoon 2025 is below 5.50. Required: withdrawal from all campus sports council positions, 10-credit maximum registration (CS201 backlog, CS210 backlog, and one first-year repeat), mandatory weekly meeting with Faculty Advisor Dr. Julian Vance.

7. Academic Recovery Contract (ARC) — Legal Terms & Enforcement Clauses

Students placed on Academic Probation must sign the ARC within 10 working days of semester commencement. Failure to sign results in registration hold. The ARC terms constitute a binding institutional agreement and are referenced in any subsequent readmission petition. Terms include: (a) Credit cap as specified by the Standing Committee; (b) Minimum Academic Support Center attendance hours with verified logs; (c) Bi-weekly advisor conference attendance; (d) Disqualification from extracurricular leadership and external representation; (e) The student acknowledges that failure to meet the SGPA target in the probationary term will trigger the next-tier consequence (suspension or further restriction) automatically without further hearing, unless extraordinary medical or personal circumstances are formally documented and certified by the University Chief Medical Officer.

8. Reinstatement Petitions & Academic Standing Appeal Procedures

Students subject to academic suspension may file a Reinstatement Petition to the Dean of Academic Affairs within 14 days of suspension notification. The petition must include: (a) a personal statement explaining the circumstances that led to the academic decline; (b) certified medical or psychological documentation for health-related cases; (c) an evidence-based Academic Recovery Plan outlining specific behavioral changes, study strategies, and support systems; (d) letters of support from at least one faculty member and one non-academic support professional (counselor, advisor). The Academic Standing Board convenes in the first week of August and January to hear reinstatement petitions. Reinstatement decisions are communicated in writing within 21 days of the hearing. Students reinstated from suspension are placed on Tier 3 Probation for the subsequent two semesters and must satisfy an accelerated recovery CGPA target.
